Profile

I'm a web-developer with a desire to dive deep into how things work. My free time is spent building applications and studying development. I began teaching myself during university and since then my passion has snowballed into an insatiable drive to explore mind-bending problems and build amazing products. Let's build them together!

Experience

Digital Campaign Coordinator (April 2015 – April 2016)
Essential
- Created a prototype of a Federal electorate segment generator with Meteor.js and the Campaign Monitor API for use across all clients
- Implemented the companies first use of video-background landing pages with jQuery for the Australian Marine Conservation Society
- Implemented jQuery ajax survey for Luke Batty Foundations, anti-domestic violence Father's day action
- Project manager across various NFP and GOV clients

Developer / Community Manager Intern (spring 2013)
We Are Social
- Helped develop website prototype for Fitness First
- Created eDMs
- Training in iOS development

Hackathons: GovHack 2016, Qantas Hackathon 2016, Unearthed Sydney 2016

Education

Web Development Immersive (May 2016 – July 2016)
General Assembly
Full-stack web-development with Ruby on Rails and JavaScript

JavaScript Study Group 10-weeks (2015) *ansarada*
One night a week JavaScript study group hosted by ansarada.

Start-up boot camp (2015) *General Assembly*
2 day boot camp on start-up fundamentals.

Bachelor of Arts – Media (2014)
Macquarie University
Media Theory, International Media Regulation, Culture and Technology.

Technologies

JavaScript
Node.js, MongoDB, ES5, ES6, jQuery, AJAX, Backbone, React, React-Native, Meteor.js, Socket.io, Three.js, D3.js, Browserify, Gulp, Grunt, WebPack, Babel, HTML5, CSS3

Ruby
Sinatra, Rails, RSpec, ActiveRecord

Projects

TIC TAC TOE 3D
Three.JS, Node.js, WebSockets, React
Gulp, Babel, Browserify, HTML5 Canvas

When on smaller-width devices it renders a DOM version of game to play.

SQUADRAWN
Rails, WebSockets, Backbone, jQuery, Paper.JS, HTML5 Canvas, CSS3, HTML5 Canvas

Create and design t-shirts with friends in real-time.

Emochi
Node.js, React, Socket.io, API, CSS3
Gulp, Babel, Browserify

A real-time chat application that only allows you to communicate with Emojis, using a very cool predictive text/emoji neural network API from Dango .

Identity Construct
JavaScript, HTML5 Canvas

An art project made in university. I use HTML5 canvas as a reference to position elements on the page.
